Professional Profile

Software Developer with hands-on experience in full-stack web development, desktop applications, automation, and AI-based software. Delivered 15+ client web applications and led development of an online journal management platform. Technologies include Python, PHP, C#/.NET, JavaScript, Java, React, Node.js, SQL, and Git.

Technical Skills

- **Programming:** Python, PHP, C# / .NET, Java, JavaScript, C++
- **Web Development:** React, Node.js, TypeScript, WordPress
- **AI & Data:** TensorFlow, Stable Diffusion, scikit-learn, NumPy, pandas, Matplotlib, Power BI
- **Databases & Tools:** SQL Server, Git, Windows, Linux (Ubuntu)
- **Scientific Computing:** MATLAB, Mathematica

Professional Experience

Freelance Software Developer

2014 – Present

Independent

- Developed and delivered 15+ client web applications, primarily with PHP, plus projects using Java, JavaScript, React, and SQL-based backends.
- Built a C#/.NET desktop accounting application for a multi-branch company, supporting operational workflows and centralized business data.
- Developed Python-based AI and automation projects, including a Persian carpet design system using TensorFlow and Stable Diffusion; supported 20+ academic and technical programming projects.

Project Manager

Oct 2018 – Mar 2023

Poyesh Pardis Pezeshki Company

- Designed a custom Windows application for project managers to support company-specific planning, tracking, and project-management workflows.

Head of Software Development Team

Jan 2017 – Sep 2018

Arman Research Institute

- Led development of a PHP-based online journal management platform supporting submission, editorial, review, and journal-administration workflows.
- Expanded platform functionality by more than 50% and contributed to 25% annual growth in new customers through new features, workflow improvements, and journal onboarding support.

Selected Projects

- **Persian Carpet Image & Plan Generation System (2025–Present):** Developing a Python-based AI system using TensorFlow and Stable Diffusion to generate Persian carpet designs and production-oriented plans for manufacturing use.
- **Automatic AnkiCard Generator (2023):** Built a Windows application integrating dictionary and translation sources, pronunciation, images, and multiple external applications to automate flashcard creation.

Education

M.Sc. in Civil Engineering – Structural Engineering

2014 – 2017

Yazd University

B.Sc. in Civil Engineering

2010 – 2014

University of Isfahan

Relevant Certifications

Machine Learning (2024) • Neural Networks and Deep Learning (2023) • Supervised Machine Learning (2022) • C#/.NET & SQL Server (2007)

Languages

Persian – Native • **English** – C1 (IELTS 7.0) • **Norwegian** – Beginner, currently learning
